CHINESE AMERICAN ART CRAFT CO.

Woolly Mammoths, extinct in the last Ice Age about 10,000 years ago, are widely known as the closest relatives of modern elephants. Mammoth tusks are mostly found in Siberia. Because of their antiquity and scarcity, objects hand-carved from them are precious collectors` items.

"Autumn Jade" is originated from Mongolia, far Northern part of China. This mineral stone contains several colors and the green color usually has better quality and is most popular. However, the pink color has the top quality but is rare from the jade mine! More importantly, Autumn Jade will not be popular in the market without a team of experience professional carvemen who made such specific design and skillful carving!
